**Note:** in square brackets I occasionally comment on the particular correction.

- page 451, equation (13.60): element (1,2) should feature  $(1 - s_I)$  instead of  $(1 - s_I)^2$
- page 487, just above the figures: “for example capital”
- page 781, 7 lines from the bottom: “to lower the price”
- page 795, first paragraph of **Further reading**: one reference to Galí (2015) suffices.
